KOREAN TANGSAN BRIDGE SEOUL, KOREA

**CONCRETE
WATERPROOFING**

Page 1 of 1

QUESTIONS: 1-800-267-8280 or www.kryton.com

BACKGROUND

In 1996, the Tangsan Bridge, which links the 1.4 km between Hapchong and Tangsan stations in southwestern Seoul over the Han River, was closed due to safety concerns.

During construction of a new bridge, Kryton Korea was contracted to provide Krystol™ materials for protecting the concrete and to improve its long-term durability and performance.

SOLUTION

Over 16 metric tonnes of Krystol™ products were used on this important section of the Seoul Subway.

In 1999, subway trains are running on the Tangsan Railroad Bridge once again, as the replacement bridge has successfully passed all the safety tests that followed its three-year construction.

PROJECT CASE STUDY

LOCATION

Seoul, Korea

OWNER

Seoul Metropolitan Subway Corporation

APPLICATOR

Hyundai Heavy Industry Co., Ltd.

DISTRIBUTOR

Kryton Korea

The Kryton Group of Companies.
