

SMART CONCRETE®

Your Trusted Partner in Concrete Protection and Infrastructure Rehabilitation

Proven Solutions for Extending the Life of
Aging Infrastructure

Why Kryton?

As a city or municipal engineer, you understand the importance of maintaining infrastructure to keep it safe, functional, and cost-effective. With decades of experience, Kryton leads in concrete durability, offering long-term waterproofing and protection solutions to ensure your assets stand the test of time and avoid costly maintenance breaks.

Comprehensive Solutions for Infrastructure Rehabilitation

Kryton provides award-winning, field-tested products designed to address the challenges of aging infrastructure, protecting against water ingress and deterioration, and reducing costly repairs and infrastructure downtime.

Our Products

- **Krystol T1:** Seals microcracks in concrete, reducing water permeability and extending the life of bridges, tunnels, and water reservoirs.
- **Krystol Plug:** Instantly stops active leaks, ideal for emergency repairs on aging water and sewage structures.
- **Krystol Repair Grout:** Durable solution for cracks, spalls, and other structural issues common in older infrastructure.
- **Hydrostop Sealer:** Repels water and guards against chloride penetration, vital for structures exposed to road salts and harsh environments.

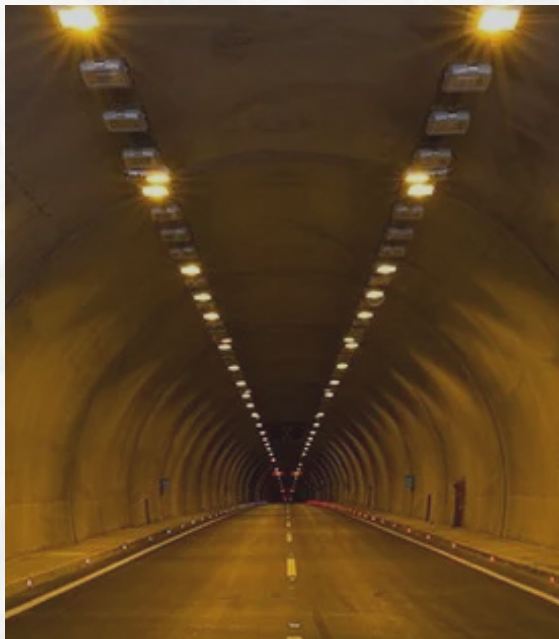

The Kryton Advantage for Municipalities

- ✓ **Durable:** Our crystalline technology repairs concrete from within, providing lifelong protection.
- ✓ **Comprehensive:** From bridges to wastewater facilities, Kryton offers solutions for both new construction and repairs.
- ✓ **Sustainable:** VOC-free products supporting sustainability goals and contributing to healthier environments.

Why Municipal Engineers Trust Kryton

- ✓ **Proven Performance:** Our products meet key industry standards (ASTM, DIN, CAN/NSF/ANSI) and provide reliable protection.
- ✓ **Expert Support:** Full technical assistance, ensuring your projects are done right the first time.
- ✓ **Long-Term Savings:** Warranties up to 10 years ensure cost-effective maintenance.
- ✓ **Innovative Technology:** Krytol actively seals cracks for the structure's lifespan.
- ✓ **Adaptable Solutions:** Whether emergency repairs or major rehabilitation, Kryton products meet your needs.

Future-Proof Your Infrastructure

Kryton's **concrete waterproofing and repair systems** are designed to protect and extend the lifespan of aging infrastructure. From bridges to tunnels, Kryton ensures lasting performance and minimized maintenance.
