

SMART CONCRETE®

Kryton's **Krystol Internal Membrane™ (KIM)** water proofing system offers every construction detail a permanent water proofing membrane that lasts longer and saves money than other water proofing systems. It's not only a money saver, but also reduces long term repair and maintenance costs.

Krystol Internal Membrane - KIM

Add to the concrete mix to turn the concrete itself into a permanent waterproofing membrane.

KIM stops water by lowering the permeability of the concrete. Through its unmatched ability to self-seal micro cracks and stop water under the most severe hydrostatic pressure, KIM is the most effective concrete waterproofing solution available.

Krystol® is a highly effective water proofing system that is suitable for all types of concrete construction. It is applied to the interior surfaces of walls, floors and slabs to provide a permanent waterproofing membrane.

Krystol Waterproofing System - KWS

Waterproofing system for concrete construction. It is applied to the interior surfaces of walls, floors and slabs to provide a permanent waterproofing membrane.
